

SDG.7.4.3

Providing Direct Energy Efficiency and Clean Energy Services to Local Industries

The Center for New Energy and Power Development at the National University of Kaohsiung (NUK) provides direct services to local industries aimed at improving energy efficiency and advancing clean energy adoption. These services include energy performance assessments, technical consultations, and expert seminars that connect academia, government, and industry to address emerging energy challenges. Website: <http://need.nuk.edu.tw/>

From January to December 2024, the Center collaborated with various local organizations on research and applied projects, such as:

--Kaohsiung City Hongxin Children and Youth Care Association: Train the Trainer – Design Thinking Workshop for Seed Teachers: CSR + USR = Max{SDGs} Education.

--Taiwan Hopax Chemicals Manufacturing Co., Ltd.: Green Energy Planning Assessment and Carbon Emission Management System Framework.

--Shimenshan Green Capital Co., Ltd.: Implementation and Promotion of UN Sustainable Development Goals (SDGs) 7 and 6.

In addition, NUK supports national green energy policy by applying for Green Energy Certificates and optimizing the use of on-campus renewable energy resources, serving as a model for sustainable regional collaboration.(see **Attachment**)
