

SDG. 7.4.5

1. Through consultation, NUK assisted 12 entrepreneurial teams to obtain the first-stage subsidies of the U-Start Innovation and Entrepreneurship Program of MOE. Among them, 2 teams won the recognition as the second-stage excellent team and received entrepreneurial bonuses.
2. In order to strengthen the relationship between alumni and the students who intend to start a business, the University actively links the faculty and alumni who have already started businesses to build a consulting network for the students to learn the entrepreneurial knowledge and practical experience, and in the long term, to expand the network of entrepreneurs.
